Elevate Your Healing with a hyperbaric oxygen chamber and step into the next level of recovery.

The latest state-of-the-art hyperbaric oxygen chamber combines advanced technology, exceptional performance, and enhanced safety features—delivering a comfortable and powerful healing experience.

What is Hyperbaric Oxygen Therapy (HBOT)?

Experience the Healing Power of Oxygen | Breathe. Heal. Thrive.

Hyperbaric Oxygen Therapy (HBOT) uses prescribed, pressurized oxygen to support the treatment of various health conditions. Every cell in the body depends on oxygen to repair, restore, and function at its best. By breathing 100% medical-grade oxygen at pressures greater than sea level, HBOT delivers a powerful boost of oxygen throughout the body, triggering a wide range of healing benefits.

“Your Path to Healing Starts Here.”

Every Breath Brings You Closer to Healing.

Hyperbaric Oxygen Therapy (HBOT) has been clinically proven to support healing across a wide range of injuries and conditions for men, women, and children of all ages. In the United States, there are 14 FDA-approved, insurance-covered indications, along with over 100 internationally recognized applications worldwide.

WHO MIGHT BENEFIT FROM HBOT?

Because oxygen plays such a vital role in cellular repair and regeneration, HBOT is also being embraced as a powerful tool for longevity, enhanced wellness, and slowing the markers of aging.

From world-class athletes to wellness advocates, HBOT has become a trusted part of many high-performance lifestyles. Tom Brady, Serena Williams, LeBron James, Tiger Woods, Simone Biles, Michael Phelps, and many more credit HBOT with supporting recovery, boosting energy, and maintaining peak health.

OXYGEN THERAPY: HOW DOES IT WORK?

TYPES OF HYPERBARIC OXYGEN CHAMBERS USED IN MEDICAL PRACTICES

Medical facilities use different types of hyperbaric chambers depending on patient needs, treatment goals, and safety requirements. The main types include:

Monoplace Chambers

- Designed for **one patient at a time**.
- Patients lie down inside a clear acrylic tube while breathing 100% oxygen.
- Ideal for individual therapy and precise monitoring.

Multiplace Chambers

- Can accommodate **two or more patients simultaneously**.
- Patients breathe 100% oxygen through masks or hoods while sitting or reclining.
- Commonly used in hospitals or clinics with multiple patients.

Portable or Soft Chambers

- Lightweight and inflatable, often used for **home-based or mobile therapy**.
- Provide pressurized oxygen, though at lower pressures than hospital-grade chambers.

Each type of chamber offers unique benefits and is selected based on medical requirements, comfort, and convenience.

OXYGEN

The Foundation of Healing . Although oxygen makes up only about **21% of the air we breathe**, it is the body's most vital nutrient. By providing **100% oxygen at the cellular level**, hyperbaric therapy promotes powerful healing with minimal risks and side effects.

PRESSURE

The term *hyperbaric* refers to air or gas at a pressure higher than normal. In a hyperbaric chamber, breathing oxygen under this increased pressure allows the body to absorb **up to 1,200% more oxygen** into the bloodstream and vital fluids such as lymph and cerebrospinal fluid—delivering oxygen where it's needed most.

BREATHE

Relax and Heal at Your Own Pace

During 60- to 90-minute treatments, patients can breathe normally and unwind while our trained medical team monitors every session. You can watch TV or a movie, listen to music, or simply take a restful nap—all while receiving the full benefits of hyperbaric oxygen therapy.

Hyperbaric Oxygen Therapy (HBOT) Benefits

Hyperbaric Oxygen Therapy (HBOT) delivers a wide range of health benefits by enhancing oxygen delivery to tissues, supporting cellular function, and reducing inflammation. Whether used for specific medical conditions or general wellness, HBOT can improve overall health, vitality, and recovery.

- **Boosts Oxygen Delivery:** Increases the amount of oxygen in the bloodstream, allowing oxygen to penetrate deeply into tissues, lymphatic fluid, and the cerebrospinal fluid surrounding the brain and spinal cord.
- **Promotes Circulation and Healing:** Stimulates the growth of new blood vessels, improving circulation and supporting healthy tissue even after treatment is completed.
- **Reduces Inflammation and Supports Immunity:** Helps decrease swelling, strengthens the immune system, and encourages stem cell release.
- **Enhances Cellular Function:** Improves mitochondrial function and regeneration, supporting overall cellular health.
- **Fights Free Radicals:** Increases production of superoxide dismutase, a natural antioxidant, helping the body combat disease and infection.

Discover How HBOT

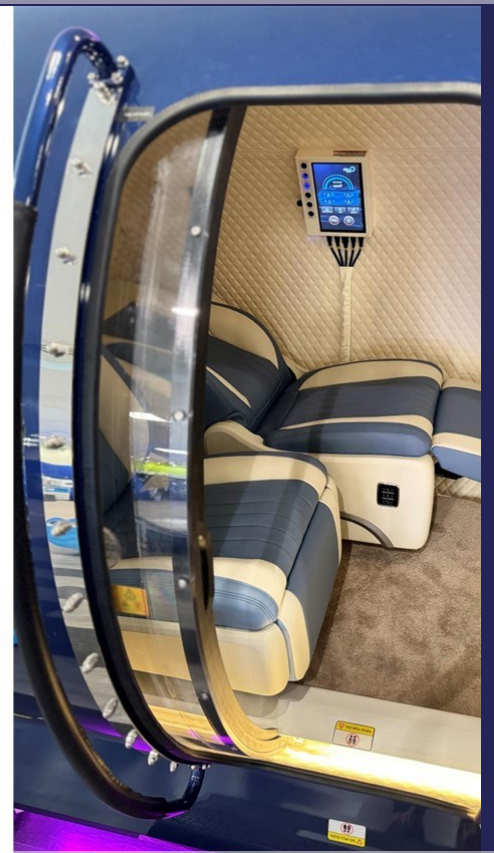

Boosts Your Body's Recovery

- **Cellular Function:** Boosts energy at the cellular level to support overall health and vitality.
- **Neurological Health:** Supports recovery for TBI, stroke, cerebral palsy, and enhances cognitive function.
- **Reduced Inflammation:** Helps manage chronic inflammation and promotes long-term wellness.
- **Healing & Recovery:** Accelerates tissue repair, reduces scarring, and speeds recovery from injuries and surgery.
- **Wellness & Longevity:** Supports anti-aging, improved skin health, and enhanced vitality.
- **Cardiovascular Support:** Improves blood flow, reduces inflammation, and aids heart health.
- **Immune System Strength:** Enhances white blood cell function to fight infections and recover faster
- **Musculoskeletal Benefits:** Reduces pain, swelling, and supports healing of bones, muscles, and joints.

IS HYPERBARIC OXYGEN THERAPY RIGHT FOR YOU?

HBOT is a **noninvasive medical treatment** that can support a wide range of health conditions, either as a primary therapy or in combination with other treatments. It has very few contraindications and minimal, rare side effects. HBOT may be especially beneficial for inflammatory conditions or situations where improved blood flow and oxygen delivery to vital organs and tissues can enhance healing.

At **Suntree Hyperbaric Center, LLC**, we carefully evaluate each patient to determine whether HBOT is appropriate based on their individual medical history and the latest clinical research. For patients who are candidates, we design a **personalized treatment protocol** to maximize the benefits of therapy.

INSURANCE & TREATMENTS

The following 14 conditions are approved by the FDA for treatment by hyperbaric oxygen therapy and are typically covered by insurance.

• Acute Thermal Burn Injury • Sudden Hearing Loss • Severe Anemia • Arterial Insufficiencies (CRAO) • Intracranial Abscess • Necrotizing Soft Tissue Infections • Osteomyelitis (Refractory) • Air or Gas Embolism • Carbon Monoxide Poisoning • Gas Gangrene • Crush Injuries / Acute Traumatic Ischemia • Decompression Sickness Radiation Injury (Tissue / Bone) • Compromised Skin Grafts and Flaps

Beyond the FDA-approved uses, Hyperbaric Oxygen Therapy (HBOT) is recognized worldwide for its therapeutic benefits. Currently, there are over 100 internationally approved conditions for HBOT treatment—including 20 in Japan, 65 in China, and 71 in Russia. Some of the most common internationally recognized or “off-label” applications include:

- Acute coronary syndrome
- Acute ischemic stroke
- ADHD
- Alzheimer’s disease
- Anoxic encephalopathy
- Arthritis (rheumatoid / osteoarthritis)
- Asthma
- Autism spectrum disorder
- Avascular necrosis
- Bell’s palsy
- Burns (thermal and chemical)
- Cancer treatment support
- Cerebral edema
- Cerebral palsy
- Chronic fatigue syndrome
- Chronic infections
- Chronic pain
- Concussion
- Cystitis
- Dementia
- Depression
- Diabetic ulcers
- Diverticulitis
- Encephalopathy
- Erectile dysfunction
- Fibromyalgia
- Fracture healing
- Frostbite
- Glaucoma
- Headaches (migraine and cluster)
- Sudden hearing loss
- Heart attack recovery
- Heart failure
- Hepatitis
- HIV/AIDS
- Hypertension

Other Treatment Conditions (cont.)

- Inflammatory bowel disease (UC)
- Inflammatory conditions
- Kidney disease
- Leukemia
- Lyme disease
- Lymphedema
- Macular degeneration
- Meningitis
- Multiple sclerosis
- Muscular dystrophy
- Near drowning
- Near hanging
- Non-healing wounds
- Osteoporosis
- Pancreatitis
- Parkinson's disease
- Peripheral neuropathy
- Peripheral vascular disease
- PTSD
- Pulmonary disease
- Radiation cystitis
- Radiation necrosis
- Radiation proctitis
- Raynaud's syndrome
- Reflex sympathetic dystrophy
- Retinal artery occlusion
- Scleroderma
- Sepsis
- Sickle cell disease
- Skin ulcers
- Spinal cord injuries
- Sports injuries
- Stroke recovery
- Sudden hearing loss
- Surgery recovery
- Systemic lupus erythematosus
- Tendonitis
- Tinnitus
- Transient ischemic attacks
- Traumatic brain injury (TBI)
- Tuberculosis
- Ulcerative colitis
- Urinary tract infections
- Varicose veins
- Vascular dementia
- Viral myocarditis

Revitalize Your Health

Experience the healing benefits of Hyperbaric Oxygen Therapy at Suntree Hyperbaric Center, for a safe, comfortable environment that promotes recovery and wellness for all ages.

Our mission is to make Suntree Hyperbaric Center, LLC accessible to all patients. If your treatment is not covered by insurance, we provide cost-saving bundles and flexible financing options through **Advance Care** and **CareCredit**. We also offer prompt-pay discounts and customized monthly payment plans to fit your budget. Speak with our team to explore the option that works best for you.

As an independent, free-standing provider of Hyperbaric Oxygen Therapy (HBOT), Suntree Hyperbaric Center, LLC participates in most major insurance networks where we operate. Accepted insurance plans may vary by state. Because we are a non-hospital provider, patient costs are typically much lower compared to hospital-based treatment, which often involves multiple co-pays and higher co-insurance.

Our goal is to make access to this valuable therapy more affordable.

Coverage Overview: Insurance coverage depends on your plan, condition, and medical need. Consultations are generally covered by insurance, regardless of the reason for seeking HBOT.

FDA-approved conditions for hyperbaric treatment are typically covered by most insurers. If your plan is not in-network, Suntree Hyperbaric Center, LLC can help with reimbursement and may bill your health plan out-of-network.

For Patients Without Coverage:

If your condition is not covered by insurance, we remain committed to providing access to care. We will work with you individually to explore financial options and create a plan that supports your healing journey.

Suntree Hyperbaric Center, LLC is dedicated to accommodating all patients seeking Hyperbaric Oxygen Therapy. For details on accepted insurance plans and available payment options, please visit our [Locations](#) page.

Suntree Hyperbaric Center, LLC
